Accuracy and reliability are the keywords for fomaco

The muscle structure of fish is very fragile. Therefore it is essential when processing to avoid any physical pressure on the product. fomaco is the only supplier of a specially designed injector for all kind of fish and operates with a low pressure and a very close needle pattern.

Far superior to traditional curing methods:

- Accurate salt distribution through entire fish
- No undercure at skin
- No overcured tails
- Continuous operation
- Considerably less handling
- Higher yield at your control

For phosphating you achieve a more uniform distribution and a better quality by using less phosphate

The muscle structure of fish is very fragile. Therefore it is essential when processing to avoid any physical pressure on the product. fomaco is the only supplier of a specially designed injector for all kind of fish and operates with a low pressure and a very close needle pattern.

Accuracy and reliability are the keywords for fomaco
Full control of start and stop of injection. Conveyor belt stops completely while needles are in product.

Ultra close needle pattern

Easy access to needle bridge and motor/pump compartment
